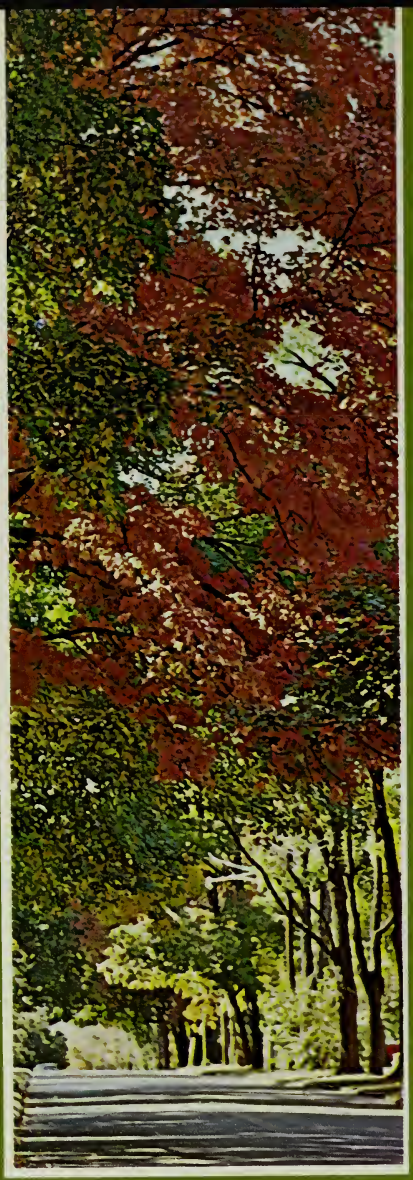
S.T.I.

LEARNING IS A TOOL OF ALL SKILLS
STI

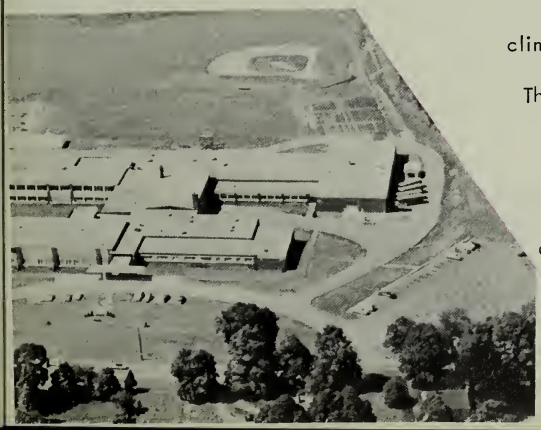


PROLOGUE

We enter through the door . . . eager to learn yet cautious of the things we do not know. Down new corridors, seeing strange rooms, faces, and instructors.

Placed in a reality, that as of yet is not real. Meeting new people, wondering about their pasts and futures. We walk into rooms heaped high with equipment but knowing not what it is used for.

All of these small wonders
add up to one fact, we have passed
through childhood and are ready to
climb the stairs of adulthood.
Though there is uncertainty we
will go on, the reason . . .
we are young, vigorous, and
our questions must be answered



# DEDICATION

"Now listen, if there's anything I can do, just let me know and I'll be glad to help." These are words often heard at Student Council meetings, yearbook meetings, Machine Design classes, and generally around the entire S.T.I.

Mr. George Keith is that type of a man, generous with his time, patience and ideas. A friend of all, he is there to understand, with a hand that reaches more than half-way.

These are just a few of the reasons why we dedicate S.T.I.'s first yearbook to him. His presense is here now, and will be felt in the future.

# D.A.

The basic aim of the Dental Assistant program includes learning the ways of preparing the instruments, mixes, and material that the dentist needs when working. Stress is placedon the speed of assisting a dentist at the chair.

The D.A. learns to take and develope X-rays and to sterilize instruments. She learns lab procedures such as taking impressions.

The Dental Assistant also learns about Head Anatomy, Nutrition, the cells and the blood, and other subjects closely related to her soon to be profession.

The basic purpose of this course is to teach the Dental Assistant to save the dentist time and to run his office efficiently.

## LPN COURSE

This is a 64 week program consisting of nursing theory and nursing practice which prepares the student nurse to take the State Boards.

A pre-clinical period is spent at at one of the hospitals affiliated with the program. An integral part of the program is the care of mothers and newborns as well as the care of the pediatric patient.

The program is opened to both male and female students. This is a very rewarding field to enter as is any medical field.

## MEDICAL ASSISTANTS

The Medical Assistant program under the direction of Mrs. Jane Pearson R.N. has an enrollment of 17 girls this year. It is a 10 month course running from September to June. The course consists of many varied classroom subjects and has an 8 week period of externship, we affiliate with the Goddard Hospital, Blue Hills Convalescent Home, Stoughton, Cardinal Cushing Hospital and the West Acres Nursing Home in Brockton. Four weeks are spent at one of the hospitals and in the remaining four at one of the nursing homes.

The purpose of the Medical Assistant course is to best assist the doctor in his office practice. Many skills and techniques must be learned and applied during our training. Taking temperature, pulse, and respiration, blood pressure and general office practice are among a few of the M.A.'s duties.

When at the hospital we train in the Emergency Room, the Medical Records Room, the Diet Kitchen and in the EKG Department. In this way we obtain the basic information on all subjects related to a doctor's practice. When at the nursing, we learn to make a bed properly, how to relate to a patient, and how to record a patient's TPR.

Upon graduation, we will receive our certification as a Medical Assistant and our white caps. It will be a day we will be looking forward to.

# Football

WAYNE SIMMONS

Basketball is a fast paced and thrilling sport. The team must control the ball constantly. Quickly working it down the court. Darting around the formidable opponent and shooting for two points. The other team starts down the court, the ball is captured by our defenders, expertly manuvering it, we score to win the game and for the players, personal satisfaction.
